WHY DO WE LEARN ENGLISH LANGUAGE?

It is to learn foreign languages. That's why pupils have such subject as a foreign language at school. Everybody knows his own language, but it's useful to know foreign languages.

I learn English, because I understand that I can use it. For example, If I go England I will be able to speak English there. If I go to the USA, I will speak English too, because English is used not only in England, but also in other parts of the world.

I learn English because I want to read foreign literature in the original. I know and like such English and American writers as Ch. Dickens, M. Twain, L.Carroll and others. I understand that I must learn English. If I know English well, I will be able to go to the library and take books by English and American writers in the original.

I like travelling. But it is difficult to visit countries. If I know the language of the country, where I'm going to, it will be easy to travel there. I like reading books. And I like reading newspapers too. Knowledge of foreign languages helps us to develop friendship and understanding among the people. For example, we have a foreign exhibition in Moscow. If I know a foreign language, it is easy for me to visit this exhibition.

Now we buy clothes from other countries. If you know English well, you can read something about the size of this or that thing. It is clear for you what this dress is made of.

There are a lot of films in foreign languages. If you know them, you can understand films without any help. Knowledge of foreign languages helps young people of different countries to understand each other, to develop friendship among them. There are international friendship camps in the world. One of them is "Artek". If you can speak foreign languages, it will be easy for you to visit such camps and speak with the boys, girls, men, women who do not know Russian. In short, I understand that I have to learn English in a proper way and I try to do it.

My daily life

Hi. As you know, I am a first-year student of the Technical Academy. My parents live in Sochi and I study in Rostov-on-Don so I need some housing. There are two opportunities for me: I can live in a dormitory (a students hostel), or to rent a flat (an apartment).

I decided to rent a flat. To make the rent smaller, I also decided to share my flat with another girl — Natasha Kozlova. She studies at the Academy, too, and she is my best friend now. I'll tell you more about her later.

Now, let me describe my usual working day. My classes begin at 8:30. So on week-days I have to get up at 7:15. I don't have an alarm clock and usually my roommate wakes me up and my working day begins. I turn on the radio and do my morning exercises while Natasha takes a shower. I don't take a bath in the morning because I don't have enough time for it. I take a cool shower (that's when I completely wake up), brush my teeth. After that I go back to our room and get dressed. I brush my hair and put on a light make-up. Then we have breakfast. Natasha makes breakfast every Monday, Wednesday and Friday. I have to serve breakfast on Tuesdays, Thursdays and Saturdays. I love to listen to the latest news on the radio while I am eating and Natasha prefers light music.

We leave the house at ten minutes past eight and walk to the nearest bus-stop. We live rather far from the Academy and it usually takes us about a quarter of an hour to get there by bus. Sometimes when the weather is fine and we have enough time we walk to the Academy. It is very healthy to walk much.

The classes begin at 8:30 in the morning and they end at 2:00 p.m. We have lectures in different subjects. As a rule we have three or four classes a day. Sometimes it is very hard to wait till they end.

Usually I don't miss my classes because I want to pass my exams successfully. But sometimes I do, especially when the weather is fine and the classes are boring.

At 11:50 we have lunch. That's my favourite time. That is the time to share the latest news and to gossip. My friends and I prefer not to go to the canteen and we often have lunch in a small cafe not too far from the Academy. At 12:30 we have to be back to our classes. During the working day we also have several short breaks that last for ten minutes.

Occasionally I have to stay at the Academy till 5 or even 6 o'clock in the evening because I go to the library to get ready for my practical classes or to write a report. As a rule I have no free time on week-days. So by the end of the week I get very tired.

We come home at about 7 o'clock in the evening. We eat supper together and share the latest news.

After supper we wash dishes, drink coffee or tea and watch TV. I prefer old comedies and Natasha likes serials or films about travelling. Sometimes Natasha and I go for a walk in the park or visit our friends.

At about eleven at night I go to bed. I like to read something before going to bed and Natasha likes to listen to some music. Sometimes I fall asleep while I am reading and Natasha gets up and switches off the light and says — Good night!

Speaking About Friends

Vlad: Good morning, mum. How are you?

Mother: Fine, thanks. Did you sleep well?

Vlad: Yes, thank you. And where is Dad?

Mother: He went out half an hour ago together with Alexei. They went shopping. Well, Vlad, it is your birthday soon. Are you going to have a birthday party this year?

Vlad: Well, I'd love to. You know, mum, now when I am at college

I have got many new friends. It would be nice if I could invite them to my place.

Mother: Excellent idea! Let's count how many friends you are going to call so that I can think about the menu and all the things.

Vlad: I want to ask my best friends. They are Ilya, Stepan and Igor.

Mother: Do I know any of them?

Vlad: I suppose you have seen Ilya. Maybe you remember that broad shouldered

fellow with fair hair and dark eyes. We came across him in the street the other day.

Mother: Ah, now I know whom you are talking about. He is fond of music and plays the guitar very well, as you told me. Okay, what about the rest?

Vlad: Stepan is a funny slim little guy with brown hair and a snub nose. He is fond of reading fantasy and I took several books from him to read. He is an easy-going fellow. I like to talk to him. He came to our place in October. But you were not in at that time. Dad saw him, I believe. And Igor is my new friend. He is very clever. He is a computer genius, the teachers say. But he is not a bookworm. He plays volleyball and swims well.

Mother: Do you want to call any of your former schoolmates?

Vlad: Actually, it will be nice to invite Misha. I haven't seen him for ages.

Mother: Good! And will you ask Lena to come?

Vlad: Oh, yes, certainly!

Mother: So, how many people do we have, all in all?

Vlad: Let me see ... Igor and Olga, Stepan and his girlfriend, Ilya, Masha, Misha and Veronica. Ah, and Lena and me, of course.

It makes ten people all together. Well, it is going to be a magnificent party, Mum!

Mother: I am sure of that.

The character of My Friend

I have a lot of friends. Most of them are my former schoolmates. But my bosom friend is Lena. She is 16. Lena isn't very tall, but she is pretty in her own way. She has red curly hair and a turn-up nose. Lena wears spectacles and when spring comes there are plenty of freckles on her cheeks, forehead and nose. But all that doesn't make her plain or ugly. I like Lena because she is well-bred, jolly and kind. She does well at school though she has an unbreakable rule: never to study at night no matter how many written reviews are coming in the morning.

She is also fond of reading plain books, and Lena sometimes thinks that one book isn't enough to read, she has two or three books going at once. My friend has a lot of books at home, and she buys them wherever she goes. She says that the books are of great help any time and they always must be at her hand. Her idea is that it's much easier to have a library of her own comprising lots of books than to try keeping everything in her head.

Lena goes in for sports and she is a member of our school basket-ball team. She is terribly quick and strong. It's a pleasure to watch her playing basket-ball: while others are hopping about in the air she always gets under their feet and grabs the ball.

I don't like people who are bored at everything and who never make the slightest effort to be pleasant. That's why my friend is Lena, the most amusing person in the world.

She thinks everything is funny — even flunking an exam.

Lena is a sunny soul by nature and always takes the slightest excuse to be amused. My friend has an imagination and her own style. Usually she writes nice compositions and once even won short-story contest that our school wallpaper holds every year.

Lena and me are good friends. We help each other a lot and try not to quarrel. But when sometimes it comes to quarreling we try to make it up at once.

Questions:

1. How old is Lena?
2. Does she wear spectacles? Describe her appearance.
3. Does she do well at school?
4. What unbreakable rule has she?
5. What books is she fond of reading?
6. Does Lena go in for sports?
7. Is she a member of the school basket-ball team?
8. Why is it a pleasure to watch her playing basket-ball?
9. Is Lena a sunny soul by nature? What makes you think so?

10. Has she an imagination? Prove it.

ЛИЧНЫЕ МЕСТОИМЕНИЯ

Личные местоимения имеют два падежа: **именительный** (theNominativeCase) и **объектный** (theObjectiveCase).

Именительный падеж	Объектный падеж
I-я	me-мне
he-он	him-ему
she-она	her-ей
it-он (-а, -о)	it-ему, ей (неод.)
we-мы	us-нам, нас
you-ты, вы	you-тебе, вам
they-они	them-им

Личные местоимения в именительном падеже выполняют функцию подлежащего именной части составного сказуемого.

He is a lawyer.

Он юрист.

It is I (he, we, they ит.д.)

Это я (он, мы, они и т.д.)

В разговорной речи местоимение I часто заменяется формой объектного падежа **me**, если оно выступает в роли именной части сказуемого.

Who's there? – It's me.

Кто там? – Это я.

Личное местоимение **it** заменяет существительные, обозначающие неодушевленные предметы, названия птиц и животных. Кроме того, оно может употребляться как указательное местоимение в значении «это» и быть формальным подлежащим в безличных предложениях, а также являться частью эмфатической (усилительной) конструкции **it is ... that, it is ... who**, которая переводится *именно, только, как раз*.

It's a book. It's interesting.

Это книга. Она интересная.

It was he who helped me.

Именно он помог мне.

It was at school that I learned to write.

Именно в школе я научилась писать.

It - как формальное подлежащее не переводится на русский язык и употребляется в следующих случаях:

а) для обозначения времени и расстояния

It is three o'clock.

Три часа.

It is two kilometres to the city.

До города два километра,

б) для обозначения явлений природы, состояния погоды, окружающей обстановки.

It is winter.

Зима.

It is always cold here.

Здесь всегда холодно

It was dark in the room.

В комнате было темно.

It will rain.

Будет дождь.

В объектном падеже местоимения употребляются в функции прямого и косвенного (предложного и беспредложного) дополнения. Если косвенное дополнение стоит в предложении после прямого, то оно употребляется с предлогом **to**.

Give **me** (косв.) **the book**, please (прямое).

Дайте мне, пожалуйста, книгу.

Give **this book** (прямое) **to me**, please (косвен.). Дайте эту книгу мне, пожалуйста.

Следует также помнить, что личные местоимения ты и вы передаются в английском языке одной формой you, которая согласуется со сказуемым во множественном числе.

ПРИТЯЖАТЕЛЬНЫЕ МЕСТОИМЕНЕНИЯ

Притяжательные местоимения указывают на принадлежность предмета лицу и имеют формы **my, your, his, her, its, our, their**, образованные от соответствующих личных местоимений **I, you, he, she, it, we, they**.

В отличие от русского местоимения **свой**, употребляемого со всеми лицами, английские притяжательные местоимения используются строго в соответствии с личными местоимениями: I read my book, you read your book, etc.

Притяжательные местоимения употребляются в функции определения к существительным. Например:

His friend made some

Его друг сделал несколько

Mistakes in his dictation.

ошибок в своем диктанте.

В случае употребления притяжательного местоимения без существительного используется специальная форма, называемая абсолютной:

my – mine

her – hers

our – ours

his – his

its – its

your – yours

their – theirs

Например:

This **book** is **not mine**, it's **yours**.

Это не моя книга, это твоя.

He is **an old friend of ours**.

Это наш старый друг.

Английскому языку свойственно более частое употребление притяжательных местоимений, чем русскому, в особенности перед названиями частей тела, одежды и других предметов, относящихся к лицу. На русский язык они не переводятся. Например:

He put **his hands** into **his pockets**.

Он сунул руки в карманы.

About my family

I enjoy the honest and open relations in my family – but I think discipline must be used when necessary. There's never been a division between us, the children, and them, parents. Freedom has made us close. I knew a girl whose parents were very strict and it made her a liar. I wouldn't like to do anything to upset my parents.

MY FAMILY

Our family is not very large. I have a father, a brother and sister. We all live together in a new flat in one of the industrial districts of Minsk.

My father Igor Ivanovich is 45 years old. He is a tall and well-built man with short black hair and grey eyes. He works at a big automobile plant as an engineer. He likes his work and spends most of his time there. By character my father is a quiet man, while my mother is energetic and talkative. Her name is Olga Petrovna. She is a teacher of music and plays the piano well. My mother always has a lot of work to do about the house and at school. She is a busy woman and we all help her.

My sister's name is Alla. Like her mother Alla has blue eyes and lovely fair hair. She is a very good-looking girl. Alla is three years younger than me. She is a pupil of the 9th form. She does well at school and gets only good and excellent marks. Literature is her favourite subject and she wants to become a teacher, the same as me.

My name is Tanya. Last year I left school and tried to enter the University. But I failed in my exams. For a year I worked at school as a secretary and attended preparatory courses. Now I'm again an applicant for entry to the philological faculty of the University. I hope to be lucky this time.

Our family is very united. We like to spend time together. In the evenings we watch TV, read books and newspapers, listen to music or just talk about the events of the day. Our parents don't always agree to what we say but they listen to our opinion. All of us like to spend our week-ends out of town. We often go to the village where our grandparents live. They are old-age pensioners now but prefer to live in the country.

My grand-grandmother is still alive. She lives in my grandmother's family and is always glad to see us. She is in poor health and asks us to come and see her more often.

I also have many other relatives: uncles, aunts, cousins and many friends. We are happy when we are together.

MY FLAT

I live in a new block of flats in Pushkin street. In front of the house there is a children's playground. Our flat is on the third floor. It's very comfortable. We have all modern conveniences, such as central heating, electricity, cold and hot running water and a telephone. There are three rooms in our flat: a living room and two bedrooms. We also have a kitchen, a bathroom, a small hall and a balcony.

Our living room is the largest in the flat. Against the wall you can see a nice sideboard. In the corner there is a TV set. In the opposite corner there is a sofa and two armchairs. The piano is on the right. There are two pictures above the piano. There is a nice carpet on the floor among the room.

Our bedrooms are very nice. The parents' bedroom is larger than the children's. There are two beds, a bedside table, some chairs and a wardrobe in it. There is a lovely carpet on the floor between the beds.

The children's bedroom is just across the corridor on the right. Here you can see two sofa-beds where my sister and I sleep at night and have a rest in the day-time. There is also a desk, two chairs and some bookshelves here. We use our bedroom as a study where we do our homework. In the corner of the room there is a small table with a tape-recorder on it.

Our kitchen is rather large. There is a stove, four stools, a refrigerator and a cupboard in which we keep cups, plates and all our dishes.

The entrance hall is small. There is a hall stand and a mirror on the wall. A telephone is on a special table under the mirror.

My College

As you become older you realize that there are several essential things and places you always long to come back to.

They are your birthplace, your home and the school you went to.

My school was a three-storeyed building situated in one of the residential districts of our city (town, settlement). All the children from the neighbourhood went there because it was a walking distance from their homes.

There was a sports ground behind the school-building and a green lawn with flower-beds in front of it. The school was built a few years ago. That's why its classrooms were light and spacious.

There were three large windows in each classroom with flower pots on the windowsills.

It was pupils' (especially girls') responsibility to water the flowers. And they did it with utmost care.

There were maps and portraits, tables and charts on the walls of the classrooms.

Our classroom was on the second floor. Its windows faced the school-yard. Our form was the only one at school who had a form-master, but not a form-mistress. He appeared to be a very kind and knowledgeable teacher who spared no time to take us to different places of interest and exhibitions. He taught us Russian and Russian literature.

We respected him very much. Our lessons began at eight o'clock in the morning and lasted till one thirty in the afternoon. We had six lessons a day.

Every pupil had a day-book where the teachers wrote down the mark each pupil had earned for his answers. The teacher also wrote down the mark in the class register.

When the teacher asked a question, the pupils who could answer it raised their hands, and the teacher called out one of them to answer the question. The pupils were often called to the blackboard to do some exercises or to write some sentences.

Questions:

1. What do you realize as you become older?
2. At which school did you study?
3. Where was your school situated?
4. Why did all the children from the neighborhood go to your school?
5. What was there behind the school-building and in front of it?
6. When was the school built?
7. Were the classrooms light and spacious?
8. What was there on the walls of the classrooms?
9. On which floor was your classroom situated?
10. What kind of a man was your form-master?

NICK'S USUAL WORKING DAY

Hi, nice to meet you all!

My name is Nick Price. I am a freshman at MIT — Massachusetts Institute of Technology. I am not

from Boston myself. I was born in Vermilion, Ohio, not far from Cleveland.

My family is not very rich, that is why I can't afford to live on a campus. But it is a rule, that every student must reside during his or her freshman year on the campus. To cover some of the expenses I've got to work part-time on the campus. I work in cafeteria.

Now let me tell you about my usual working day. I wake up at seven in the morning. My alarm-clock radio is tuned to my favourite radio station. My roommate Todd Hall is a football player. He jogs every morning at 6:30. He is still out jogging when I get up. First I take a cold shower and brush my teeth. Then I dress myself up and rush to work — to the University cafeteria. I wash dishes and clean the tables. It is not a very interesting job, I know that, but soon I'll be a cook and will earn more. My boss Suzie is very strict but very nice when you do your job properly.

My first class starts at 11:15. The professor is never late for his classes. The lecture hall we sit in has about 100 seats. MIT is a very big school. I think that it is the best school of science and technology in the US.

At 2:00 p.m. I eat lunch at school cafeteria. The food is free for me because I work there. I am a vegetarian and I don't like drinks with caffeine. I prefer cool filtered water or juice.

Then I have two more classes. I need to go to the library right after the classes to do my homework. There I meet my friends and we talk a lot. Twice a week I play basketball with my friends. I swim once a week. Usually after library we go out to the cafe or just sit outside and talk.

I have dinner at 6:00 p.m. at the little Chinese restaurant not too far from the dormitory or I cook myself in the kitchen in my dorm. My favourite food is salami pizza and potato salad.

After dinner I watch TV or play ping-pong with my friends. When it is Friday, we go to the football game.

I usually read before I go to bed. It calms me down after the long day. I guess, that's pretty much it for now. See you later!

General understanding:

1. Where does Nick Price study?
2. What year of study is he in?
3. Is Nick from Boston?
4. Is Nick's family a rich one?
5. What is Nick's job? Do you think he enjoys it?
6. Is Massachusetts Institute of Technology a good school?
7. Where does Nick spend his evenings?
8. What does Nick usually do on Friday nights?

My Working Day.

Hello, my name is... I am a second-year student of Belgorod Industrial College. And I'd like to tell you about my ordinary day. My alarm clock wakes me up at half past six every morning and it's time for me to get up. I do my morning exercises to the music and go to the bathroom. I take a shower and rub myself with a towel. Then I wash my face, brush my teeth, do my hair and dress.

After that I have my breakfast. By the way I never read while I'm eating, because it is very harmful. My things are already in bag and I leave the house for college at eight o'clock sharp. Classes begin at half past eight. Every day we learn a lot of new things in the college. Our lessons are over at about two p.m., but I don't go home immediately after studies as I have got some individual work. Rather often I go to the reading hall in our library if I need some material for my report at the seminars.

Go home I seldom take a bus. If the weather is fine it's very pleasant to take a walk after work. I usually come home at about three or four p.m. I try to spend my free time usefully. I return home, have some rest (I like to take the "horizontal" position and close my eyes.) In 20 minutes I'm full of strength again. As a rule I have my meals at home. After dinner I have a lot of work to do: texts to read, exercises to write, grammar to learn, rules to memorize. It takes me long to do my homework.

At last I have a rest and time to relax. I'm fond of doing many things. It's always pleasant to spend free time with my fellow-students. If the weather is bad I stay at home to listen to music, play computer games or surf on the Internet, read a detective story or watch TV if there is any interesting programme or a good film. Although it's a long day for me I never really feel I'm missing out on anything. I just try to use every minute of my life to do something useful, because only time can't be replenished

A HOBBY FOR EVERYBODY

A hobby is something that people like to do when they are not at their usual work. It is something done for pleasure.

Of course, you enjoy doing something in your free time. Perhaps it is collecting stamps, because that is one of the most popular hobbies; it can be a great help in geography, history and some other subjects. Some people like photograph. Other hobbies are collecting coins, beautiful stones, toys, different tickets.

If you are interested in music, you may begin collecting discs.

Nowadays a great number of new hobbies have appeared. Many people are fond of hunting, but not with guns. They hunt birds and animals with a camera. Both boys and girls are fond of computer games. Collecting computer games and playing them has become one of the most widely spread hobbies.

Well, it's very difficult to describe all the hobbies known in the world. The main thing is that all of them must be useful.

Choose an interesting hobby and enjoy it!

My leisure.

Tastes differ. Different people like different things, different people have different hobbies.

I go in for sports, I like to play tennis. I go to play tennis every day. Sport is very important part of our life. Many people go in for sports, they jogging, walking, swimming, skating, skiing, train themselves in clubs and different sections.

Physical training is an important subject at school. Pupils play volleyball, football, basketball. I have been playing tennis for 5 years. Tennis became very popular now. I take part in different competitions.

To be in a good shape I'm jogging every morning and do my morning exercises. Everyone should do all he can to stay healthy and choose the sport he is interested in. I do not understand people who say that they like sport, but they only watch sport on TV.

If one goes in for sports he feels much better, looks much better, sleeps much better. Your physical appearance will change too. You will be slimmer and trimmer. And what is even more important you will not get sick often.

Why do I go in for sports? Because I think that it is very important for a man to be strong and well-built. Sport is not for weak, because, you have to learn how to lose, and it's not easy. My favorite proverb says: "A healthy mind in healthy body".

<p>Questions:</p> <ol style="list-style-type: none"> 1. What is your hobby? 2. What sports do you go in for? 3. Do you like summer (winter) sports? 4. What does it mean to be healthy? 5. Why did you chose tennis? 6. Who is your favourite tennis-player? 	<p>Vocabulary:</p> <p>to jog — бегать</p> <p>to skating — кататьсянаконьках</p> <p>to skiing — кататьсяналыжах</p> <p>competition — соревнование</p> <p>shape — форма</p> <p>health — здоровье</p> <p>slim — стройный</p> <p>trim — в хорошей форме</p> <p>weak — слабый</p> <p>tolose — проигрывать</p>

Практическая работа №21

Тема: Магазины, товары, совершение покупок. Множественное число существительных.

Введение лексики по теме

Цель: Совершенствование и активизация словарного запаса обучающихся.

Перечень оборудования для проведения работы: тетрадь, письменные принадлежности, словарь.

Продолжительность: 2 часа

Краткие теоретические положения:

Множественное число существительных в английском языке.

Исчисляемые существительные могут иметь форму единственного числа, если речь идёт об одном предмете, и множественного числа, если речь идёт о двух или более предметах. Форма множественного числа у большинства исчисляемых существительных образуется с помощью суффикса "-s (-es)", например:

a book - books a table - tables

a bridge - bridges a boy - boys

В английском языке есть небольшое количество существительных, которые образуют форму множественного числа не по общему правилу:

Исключения:

Единственное число	Множественное число	Перевод
man	men	мужчины, люди
woman	women	женщины
mouse	mice	мыши
tooth	teeth	зубы
foot	feet	ступни, ноги
child	children	дети
ox	oxen	быки
goose	geese	гуси
sheep	sheep	овцы
deer	deer	олени
swine	swine	свиньи

Существительные, оканчивающиеся на "-f/-fe", во множественном числе пишутся с "-ves". Если слово в единственном числе оканчивается на "-o", то к нему во множественном числе прибавляется суффикс "-es". Если же слово оканчивается на "-y" с предшествующим согласным, то во множественном числе к нему прибавляется суффикс "-es", а буква "y" переходит в "i", например:

leaf - leaves life - lives tomato - tomatoes

Negro - Negroes army - armies family - families

Неисчисляемые существительные имеют только форму единственного числа и согласуются только с глаголами в единственном числе:

Her hair is blond. Волосы у неё светлые.

The money is on the table. Деньги лежат на столе.

Имеются существительные, которые напротив употребляются только в форме множественного числа. К ним относятся слова, обозначающие предметы, состоящие из двух частей: trousers - брюки, braces - подтяжки, scissors - ножницы, glasses - очки, или собирательные существительные: troops - войска, goods - товары, clothes - одежда, police - полиция, people - люди. Shops and Shopping”

I. Proverbs and sayings

Read the proverbs and sayings and give their Russian equivalents. Have we the corresponding ones in our language?

- If the cap fits, wear it.
- Be dressed as neat as a new pin.
- To cost a pretty penny.
- Ask your purse what you should buy.

Shops and Shopping

When we want to buy something, we must go to the shop where it is sold. In the shop window we see what is sold in the shop.

Sugar, tea, coffee, salt, pepper, ham, bacon, and so on are sold at the grocer's. Bread is sold at the baker's, meat at the butcher's. We go to the greengrocer's for vegetables and fruit. We buy boots and shoes at the shoe shop. We buy books at the bookseller's and jewelry and watches at the jeweler's.

The salesman or salesgirl stands behind the counter. We ask the salesman: "How much is this?" or "What is the price of that?" He tells us the price. He gives us the bill. At the cash desk we give the money and the bill to the cashier, who gives us a check and our change. The salesman wraps up the goods and gives them to us. We put them in our bag.

Some shops have many departments. We can buy nearly everything we need there. They are called department stores. In some shops there are no salesmen, but only cashiers. The customers choose the goods they want and pay at the cash desk. These are called self-service shops. If someone tries to take things from a shop without paying they are almost certain to be caught. Most shops have store detectives who have the job catching shoplifters. Shoplifting is considered a serious crime by the police.

The Hawks Go Shopping

The other day my wife took me on a usual shopping round. In fact I hate going to the butcher's, grocer's and other shops of this sort but of course I have to help my wife about the house.

First we bought some pork and beef at the butcher's. Then we dropped in at the grocery and greengrocery. My wife wanted to buy sugar, salt, tomatoes and cucumbers. We also called at baker's where we bought a loaf of brown bread, some buns and biscuits.

On our way home we were passing Selfridge's. "Let's drop in here for a while. You need a suit for everyday wear", my wife said. I agreed.

Selfridge's is one of the biggest and most popular stores in London. They sell everything here. All the things for sale are on the counters. The customers walk round and choose what they want. The store has several departments: ready-made clothes department, footwear department, hat department, knitted goods, linen and underwear, fur, textiles, sports goods, perfumery, jewelry, souvenirs, toy, stationery, household, department for musical instruments, for electrical appliances, etc.

When we entered the shop we went straight to the men's department. A shop assistant showed us a number of suits but we didn't like any of them. One of them was a bit loose on me, another was too tight. As to the third our opinions were quite different. It was to my taste. And my wife found it too expensive. The assistant showed us a cheaper suit. It was well-made but absurd in shape. We were about to leave the counter when they delivered a new selection of goods. They were not only suits but various kinds of clothes: coats, raincoats, shirts, jackets, trousers and ties. I tried on two or three suits. The last was just the thing. It was my size and fitted me perfectly. We both liked the suit and it was worth every penny it cost. "We'll take it, wrap it up, please!" I said to the shop assistant.

The most popular outdoor winter sports are shooting/ hunting, hockey and, in the countries where the weather is frosty and there is much snow — skating, skiing and tobogganing. Read the text «Sport in our life» and discuss it.

1. I'll speak about sports in Russia. Our people are great sport lovers. Certainly in our school we haven't got such conditions for physical exercises as they have in the USA or Great Britain but we are good sportsmen too. Russian children start to go in for sports since their early childhood. Like children in other countries we are fond of running, jumping, skipping, playing snowballs. Just remember yourself when a child – you always moved, you hated to stand still. When we grew up our sport activities became more serious. Now we attend sport clubs or go to sport centers if we are interested in staying

healthy.

2. In my opinion

many Russian people are fond of sports. Sport plays an important role in our lives.

We know many Russian athletes who win in European and world championships. Our figure skaters are the best. They take a lot of cups and medals in different competitions. Who doesn't know Russian skiers! We are proud of them! I want to remind you the results of the last Olympic Games. The Russian team won a great number of gold, silver and bronze medals. One of the champions was our countrywoman. It is our cyclist Slyusareva.

So, sport helps us to stay in good shape, to build character. It teaches us to win and to lose. Besides, it is a good way to meet different people and make new friends.

3. As for me, I want to tell you about sports in our college. You know we pay great attention to sports in the college. Any boy or girl who shows good results at our PE lessons is given every help to become a good athlete or even champion. We have PE twice a week and we enjoy our lessons very much. The lessons are held in two gyms and in the sports ground. At the lessons we run, jump and play sport games. From time to time in the college competitions and sport festivals take place. We are crazy about volleyball and basketball. Our volleyball team is the best in the town. Andrey Tinkov, Ilya Obrazumov, Alexander Generalov are the best volleyball players. Each student in the college knows Rita Gorbunkova, Anna Vishnevetskaya, Oxana Kholopova. The girls are excellent runners. They won the relay cup this spring.

In my opinion every person should go in for sports because it helps people to be strong and agile. It makes us more organized and better disciplined in our daily activities. Any kind of sports has its own advantages but I prefer volleyball. I attend a volleyball club in the college. I am sure this sport game develops character and quick thinking.

Text Travelling

The scientific and technological progress of the 20-th century has allowed people to overcome time and distance. The whole world is open now. We can choose any place on the planet and go there on business or for pleasure.

We can go to the place of our destination by sea, by air or by train, by car or even by motorbike. All means of travel have their advantages and disadvantages. And people choose one according to their plans and destination.

If you want to get somewhere as quickly as possible the best way is to travel by plane. Many people prefer travelling by air as it is the most convenient and comfortable means of travelling.

The railway is still one of the most popular means of communication and, besides, it is one of the cheapest. With a train you have speed, comfort and pleasure combined, you can enjoy the beauty of the changing scenes that fly past you.

Many people enjoy travelling by sea. They say it is the most pleasant means of travel which combines speed and comfort. You feel as if you are walking on good solid ground when on board the big ocean liner. You can enjoy fresh sea air, the sights of the sea and the sky. But some passengers may be unhappy when they feel sea-sick, and then travelling by sea becomes a real torture for them.

With a motor car one can travel quickly, cheaply and comfortably for long distances without getting too tired. Travel by car is a more personal experience.

You can go as slowly or as fast as you wish, stop when and where you choose. But it is not altogether pleasant when you ride on a bumpy road or get a flat tire or still worse, when your tank runs out of petrol. But what can be better than to feel the wind in your face, to see houses, trees and people flash past, to feel the real joy of speed.

If we are fond of travelling, we see and learn a lot of things that we can never see or learn at home, though we may read about them in books, and newspapers and see pictures of them on TV. The best way to study geography is to travel, and the best way to get to know and understand people is to meet them in their own homes.

Практическая работа № 7

Тема: Россия, ее национальные символы, государственное и политическое устройство. Past Simple Tense. Введение лексики по теме.

Цель: Совершенствование и активизация словарного запаса обучающихся.

Перечень оборудования для проведения работы: тетрадь, письменные принадлежности, словарь.

Продолжительность: 2 часа

Задание: Образование Past Simple

Предложения в Past Simple образуются при помощи вспомогательного глагола to do (в форме прошедшего времени, did) и второй формы основного глагола. В случае правильного глагола к нему просто прибавляется окончание -ed.

listen (слушать) — listened (слушал)

I listened music and danced. (Я слушал музыку и танцевал.)

Неправильные глаголы в английском языке образуются согласно своим правилам. Чаще всего список основных неправильных глаголов просто заучивается (хотя и можно найти некоторые закономерности).

Вспомогательный глагол did в Past Simple употребляется также, как глагол does в Present Simple. Он используется в вопросительных и отрицательных предложениях:

Did you listen this song? (Вы слушали эту песню?)

No, I did not listen this song. (Нет, я не слушал эту песню.)

Обратите внимание: если в предложении есть вспомогательный глагол — то основной глагол ставится в первой форме!

В утвердительных предложениях вспомогательного глагола нет, зато основной — во второй форме. Ниже представлен краткий список неправильных глаголов английского языка и их второй формы. В отличие от Present Perfect, Past Perfect не вынуждает следить за лицом местоимений и в зависимости от него менять форму вспомогательного глагола.

Для того чтобы образовать Future Simple, нам нужен вспомогательный глагол will. На первом месте будет подлежащее, за ним следует will, на третьем месте – основной глагол без частицы to.

FACTS OF THE BELGOROD REGION AND THE TOWN OF BELGOROD

The Belgorod Region is located in the South of European Russia within 49 15' and 51 20' of the North latitude. It borders on Kursk and Voronezh Regions and it has an external frontier with Ukraine.

The region covers 17.130 sq. km and stretches 182 km from North to South and 266 km from East to West. The Region's population is 1 450 000 people. The Regional Center - Belgorod is 700 km South of Moscow.

Belgorod is one of Russia's oldest towns dating back to 1596, The name ^{1L}Belgorod" translates to "White City", a reference to the chalk hills upon which the city sits. It was founded as a fortress on the right bank of the then navigable Seversky Donets.

Belgorod's history regardless of the period of time covered has been one of attacks by many enemies. It used to come under numerous Tartar attacks.

In 1727 the Belgorod province was formed and in 1779 Belgorod became a district town of the Kursk province. It grew bigger with the years. The Theological College was in place in the early 17th century when it had 16 churches but only 3 schools.

The Soviet power was proclaimed on the 26th of October 1917, and in the summer of 1930 it was given the status of district centre. On October, 24 1941 Belgorod was seized by the German army, then it was liberated but retaken by the fascist in about 5 weeks. My native town Belgorod

I would like to tell you about my native town. Belgorod is not a small provincial town. It's quite big, its population is more than three hundred thousand. Our town is the main administrative, industrial and cultural center of western Russia. It was of great importance in the past - its fortress protected Russia's southern border against Mongol and Tatar attacks.

I'd like to say that our city is well-known in the country and even all over the world. During the Great Patriotic War the greatest Tank Battle took place not far from Belgorod, in the village of Prokhorovka. It was one of the main turning points in the war.

Young people move to a bigger city when they graduate. Some graduates try to find jobs in Moscow, Saint Petersburg, Kursk or other cities. There are more companies, firms, factories, plants, joint stock companies, than in Belgorod where they can work as engineers, programmers, interpreters, managers and etc.

Another point is they look for good or better salaries. I wouldn't say that all young people do their best to leave Belgorod. A lot of them like our town, it's very green with a lot of parks, beautiful streets and buildings, nice cafes, sport centres. It's a pleasure to work and have a rest here. Our town is rich in sights. There are several museums here, for example: the Historical Museum, the Diorama museum, Fine Arts Gallery, the Exhibition Hall, the Literary Museum, the Museum of Applied Art.

Town people admire innumerable monuments and statues in the streets and parks. The most imposing are the monument to Prince Vladimir, the Eternal Fire to the Unknown Soldier, to Shchepkin, the famous Russian actor and etc. A lot of flowerbeds, wonderful fountains, churches and cathedrals with huge golden domes beautify the town.

So, if you have a good job and a place to live why move to another city? As for me I'm not planning to leave Belgorod. It's my native town, I've got a lot of good friends here. My favourite places here are Sobornaya Square and the area around our University with a nice Church, a beautiful fountain, the embankment and flowerbeds. I'm quite pleased to live here.

Diana: Hi, Helen! Haven't seen you for ages! How are you?

Helen: Just fine, thanks, and you?

Diana: OK, Thank you. I saw you last in the library. Were you preparing for the talk on English? What do you think about English?

Helen: I think English is the most popular language nowadays. People speak English all over the world. In Russia and France, in Germany and Italy, in Spain and Egypt people learn English as a foreign language.

Diana: I know they do. By the way, they say, that English has become an international language in the 20th century.

Helen: Oh, yes, it certainly has. People will understand you practically everywhere if you speak English. In most of the countries people speak English and their native language of course.

Diana: And in what countries do people use English as their native language?

Helen: In Great Britain, the USA, Canada, Australia and New Zealand. These are English-speaking countries.

Diana: So in all these countries people speak the same language, don't they?

Helen: My answer is "yes" and "no". Through they all speak English, yet it is a little different in each of these countries.

Diana: You don't say so! I never knew that Americans and the English speak different languages.

Helen: Oh, no! They don't. They speak English in both countries, but people speak American English in the USA and British English in Great Britain. Different words often name the same things.

Diana: What do you mean?

Helen: I mean that people live in *flats* in England but they live in *apartments* in America. They eat *cookies* and *candies* in the USA, but *biscuits* and *sweets* in Great Britain. Children go to school in the *fall* in America but in *autumn* in England.

"Unwritten Rules" of Great Britain

Good and bad manners make up the social rules of a country. They are not always easy to learn because they are often not written down in books. For example, British women didn't go into pubs at the beginning of this century because it was not considered respectable behaviour for a woman.

Now both women and men drink freely in pubs and women are fully integrated into public life. Visitors to Britain are often surprised by the strange behaviour of the inhabitants. One of the worst mistakes is to get on a bus without waiting your turn in the queue. The other people in the queue will probably complain loudly! Queuing is a national habit and it is considered polite or good manners to wait for your turn.

In some countries it is considered bad manners to eat in the street, whereas in Britain it is common to see people having a snack whilst walking down the road, especially at lunchtime. Britons may be surprised to see young children in restaurants in the evening because children are not usually taken out to restaurants late at night. And if they make a noise in public or in a restaurant it is considered very rude. In recent years children are playing a more active role and they are now accepted in many pubs and restaurants.

In recent years smoking has received a lot of bad publicity, and fewer British people now smoke. Many companies have banned smoking from their offices and canteens. Smoking is now banned on the London Underground, in cinemas and theaters and most buses. It's becoming less and less acceptable to smoke in a public place. It is considered rude or bad manners to smoke in someone's house without permission.

Social rules are an important part of our culture as they passed down through history. The British have an expression for following these "unwritten rules": "When in Rome, do as the Romans do".

Questions:

1. What make the social rules of a country?
2. What was respectable behaviour for a woman in 20th century?
3. What do you know about queuing?
4. What do you think about smoking?
5. What is the important part of our culture?

Britain in Brief

The United Kingdom of Great Britain and Northern Ireland with an area of 244 000 square miles is situated on the British Isles, which are separated from the European continent by the North Sea, the Strait of Dover

and the English Channel. Britain's population is over 56 million. Four out of five people live in towns. The largest cities of the country are London, Birmingham, Liverpool, Manchester, Glasgow and Edinburgh.

The UK is a monarchy: the head of the state is a king or a queen. In practice, the Sovereign reigns, but does not rule: the UK is governed by the Government. The present Sovereign is Queen Elizabeth II.

The territory of Great Britain is small. Yet the country has a wide variety of scenery.

The heart of Britain is England. It is the richest, the most fertile and most populated in the country. The north and the west of England are mountainous, but all the rest of territory is a vast plain. In Northwest England, there are many beautiful lakes with green, wooded or grassy shores and grey mountains all around.

The smallest of Britain's countries is Wales. The largest part of Wales is covered with rocky mountains, which are difficult to climb. Most people in Wales live in the coastal plains.

Scotland is a land of mountains, wild moorlands, narrow valleys and plains, famous lakes and no end of large and small islands. The Highlands of Scotland are among the oldest mountains in the world. One-third of the people in Scotland live in or near its capital, Edinburgh, and its great industrial center, Glasgow.

The capital of Great Britain, London, stands on the Thames. The Thames is the busiest and the most important river in Great Britain, but it is not very long. The climate of Great Britain is mild.

The Problem of Environmental Protection

Environmental protection is the main problem facing humanity nowadays. The image of a sick planet has become firmly established in the public mind lately. Ten years ago the word 'ecology' hardly meant anything for the majority of people, but today we can't help bearing it in our minds. It has happened because of the growing effect of the rapid industrial development of the natural world which has negative features of its own. As a matter of fact the state of environment has greatly worsened of late.

There is no doubt that soil, water and air are contaminated with toxic wastes. Over the past few years we have been constantly speaking about ozone holes, droughts, high level of radiation, about food contaminated with chemicals. Scientists in many countries are very much concerned about drastic changes in weather patterns. The worst drought, the mildest winter and the most devastating hurricanes have become typical in those parts of the world where they used to be a rare occurrence.

Weather patterns have been changing recently due to the global warming-up process and its major reason — the greenhouse effect. The greenhouse effect is created by carbon dioxide emissions, released by industrial facilities and a constantly increasing number of cars. Thus it is of vital importance that the world should start cutting down the release of gases that contribute to the greenhouse effect. What is the reason for people

getting so much worried about the state of environment? The answer to this question is fairly simple. The thing is the deterioration of the environment is telling heavily on people. They are paying for this with their health. And it is obvious what all people need is a healthy environment.

To solve this burning problem it is necessary for people to combine efforts, to raise safety standards at all industrial facilities, to adequately process by-products of industry, to set up an international space laboratory to monitor the state of environment and set up an international centre for emergency environmental assistance. All these measures will help us in solving these important problems and prevent us from dangerous illnesses and diseases.

Краткие теоретические положения:

В английском языке существует 4 типа вопросов: Общий, специальный, альтернативный, разделительный.

Общий вопрос относится ко всему предложению в целом, и ответом на него будут слова yes или no. Порядок слов в общем вопросе:

1. Вспомогательный (модальный, глагол – связка), глагол.
2. Подлежащее (существительное или местоимение).
3. Смысловой глагол (или дополнение).

Environment

Since ancient times Nature has served Man, being the source of his life. For thousands of years people lived in harmony with **environment** and it seemed to them that natural riches were unlimited. But with the development of civilization man's interference in nature began to increase.

Large cities with thousands of smoky industrial enterprises appear all over the world today. The by-products of their activity **pollute** the air we breathe, the water we drink, the land we grow grain and vegetables on.

Every year world industry pollutes the atmosphere with about 1000 million tons of dust and other **harmful substances**. Many cities **suffer** from smog. Vast forests are cut and burn in fire. Their **disappearance** upsets the **oxygen balance**. As a result some rare species of animals, birds, fish and plants disappear forever, a number of rivers and lakes dry up.

The **pollution of air** and the world's ocean, **destruction of the ozone layer** is the result of man's careless interaction with nature, a sign of the ecological crises.

The most horrible **ecological disaster** befell Ukraine and its people after the Chernobyl tragedy in April 1986. About 18 percent of the territory of Byelarus were also polluted with **radioactive substances**. A great damage has been done to the agriculture, forests and people's health. The consequences of this explosion at the atomic power-station are tragic for the Ukrainian, Byelorussian and other nations.

Environmental protection is of a **universal concern**. That is why serious measures to create a system of **ecological security** should be taken.

Some progress has been already made in this direction. As many as 159 countries — members of the **UNO** — have set up **environmental protection agencies**. Numerous conferences have been held by these agencies to discuss problems facing ecologically poor regions including the Aral Sea, the South Urals, Kuzbass, Donbass, Semipalatinsk and Chernobyl.

An international environmental research centre has been set up on Lake Baikal. The international organization **Greenpeace** is also doing much to **preserve the environment**.

But these are only the initial steps and they must be carried onward to **protect nature**, to **save life on the planet** not only for the sake of the present but also for the future generations.

“Saving our planet”

- Do you realize how important our environment today is?

- I know there are a lot of serious and crucial problems in our modern world. And one of them is pollution.
- Yes. The air, the water and the ground are polluted with chemicals, poisonous gases and wastes. It's really dangerous for our health.
- Besides, it kills so many animals, fishes and plants too. Do you think it is possible to save the Earth?
- Well, to my mind, we should try. We should walk or cycle whenever possible.
- You are right. If people tried to walk or cycle instead of driving cars, the air would be much cleaner.
- And we should also avoid dropping litter outside and buying packaged food, for example. Litter is a horrible problem for big cities.
- If people took rubbish, bottles and paper to recycling centres, they would protect their environment from pollution.
- Yes. Recycling saves trees and energy too. So we must save our planet rather than destroy it.

«Natural disasters»

- Have any dangerous natural disasters ever happened in your area, Frank?
- Oh, yes! There was an awful flood last year in our town.
- How did you behave during and after the disaster?
- Emergency workers rescued us from the flood. They helped us to climb on the roofs to escape the high level water. And we had a lot to do after the water had gone away. We repaired our houses and cleared away the rubbish on the roads.
- I'm really shocked to hear that. Could the flood have been predicted?
- Unfortunately nobody warned us of that but it was quite expected for all of us. It didn't catch us by surprise because the snow had suddenly melted the day before.
- What is the most terrible natural disaster to your mind?
- As for me volcanic eruptions, tornadoes, earthquakes and tsunamis are the most destructive. They cause a lot of damage and kill people and animals.

Innovative technologies

Science is important to world peace in many ways. On one hand, scientists have helped to develop many of the modern tools of war. On the other hand, they have also helped to keep the peace through research which has improved life for people. Scientists have helped us understand the problem of supplying the world with enough energy; they have begun to develop a number of solutions to the energy problem - for example, using energy from the sun and from the atom.

Scientists have also analyzed the world's resources. We can begin to learn to share the resources with the knowledge provided to us by science. Science studies the Universe and how to use its possibilities for the benefit of men.

Science is also important to everyone who is affected by modern technology. Many of the things that make our lives easier and better are the results of advances in technology and, if the present patterns continue,

technology will affect us even more in the future than it does now. In some cases, such as technology for taking salt out of ocean water, technology may be essential for our lives on Earth.

The study of science also provides people with an understanding of natural world. Scientists are learning to predict earthquakes, are continuing to study many other natural events such as storms. Scientists are also studying various aspects of human biology and the origin and developments of the human race. The study of the natural world may help improve life for many people all over the world. A basic knowledge of science is essential for everyone. It helps people find their way in the changing world.

1).What piece of technology couldn't people below live without?

I couldn't live without my computer at home. I use it all the time. It is like a typewriter and address book for me and it is also used for checking my spelling. Besides I can go on the Internet and discover everything about anything, it's a brilliant source of information, I've designed my own website and I'm getting loads of information for school. Besides some websites are packed with quizzes, games and competitions, it's all you need for hours of fun on your computer. You can play and learn on it. It is absolutely essential. I don't know how I ever manage without it. But my elder sister thinks people are getting a bit too dependent on computers. She thinks that we rely on them too much. My sister says, "You can't rely on all the information, you don't know who it has been written by or where it's coming from. To be dependent on anything, especially a lifeless machine, that can quite easily break down, is not good. Besides computers shouldn't replace seeing your friends."

Kate

I couldn't possibly live without my car. Convenience seems to be the most common and most logical answer: cars take you where you want to go and when you want to go there. I can travel freely and comfortably wherever I want. Besides it allows me to live where I want as I can easily get to the place I need with the help of the car. Besides a car is a way of self-expression. I really hate to be without it. I think a car is a necessity rather than a luxury. But my wife thinks there are too many cars in our cities. Some people use them in cases when they could go on foot for example when going to buy a newspaper in a kiosk. It's necessary to give thought to problems caused by cars. Pollution, accidents and so on. She says that cars are useful but not essential and it's nice when cars are banned from the central shopping areas. I don't agree with such situation but I have to accept it. My wife prefers to go to work using intercity transportation system. She says that during the rush hour, a trip from our home to her work by car takes much more time than a trip on foot. But I prefer to use my car. It suits me.

John

I couldn't imagine my life without my phone or I should say phones because I've got a mobile, too. I need a telephone to get in touch with my friends or to call the police or an ambulance. It is almost impossible for me to live without my phones. At home I've got a cordless telephone, I think it saves time when you have a receiver just at hand. But my mum was against buying a cordless phone because if there is some problem with electricity it wouldn't work and you'll be totally lost. She also thinks that it is a luxury to have a mobile, it is too expensive, it is more trouble than it's worth. Besides she says that mobiles are dangerous for health. The rays may cause headaches and even more dangerous diseases. I don't believe her. For me my telephones are really invaluable.

Ann

2) Are the statements below true or false?

1. Kate uses her PC for typing and keeping information.
2. Kate uses her computer to get information from the Internet.
3. Kate's sister thinks it's not clever to believe all facts stored on the Internet.
4. Kate's sister considers electronic devices not reliable.
5. John doesn't like his car but he needs it.
6. John's wife most probably goes to work by bus than by car.
7. John doesn't like the situation when he can't use his car for going shopping.
8. John's wife spends less time to get to her work when she walks than when she goes by car.
9. Ann doesn't agree to have one phone.
10. Ann's mum thinks that telephones are more trouble than profit.
11. Ann's and her mum's opinions about the phone are different.
12. There are some problems with computers, cars and telephones.

Альтернативный вопрос предполагает выбор между 2 возможностями. Начинается как общий вопрос, затем следует разделительный союз **or** вторая часть вопроса.

альтернативные вопросы – это вопросы, которые предлагают сделать выбор из двух или более предметов, качеств, лиц, действий и т.д.

В альтернативных вопросах всегда присутствует союз «or» (или), который соединяет предложенные варианты. Еще одна особенность – это наличие ответа в самом вопросе. Отвечающему нужно только выбрать один из предоставленных вариантов. Однозначные краткие ответы «да» и «нет» в подобных вопросах недопустимы по смыслу. Альтернативный вопрос можно задать к любому члену предложения. Рассмотрите следующие примеры:

Do you like apples or pears? – Ты любишь яблоки или груши?

Is she from USA or from Canada? – Она из США или из Канады?

Is this your room or mine? – Это комната твоя или моя?

Альтернативные вопросы имеют устоявшуюся интонационную окраску. В первой части вопроса, до союза **or**, интонация повышается, после союза – понижается.

Text. Modern computer technology

The term "information technology" evolved in the 1970s.

The history of information technology, however, predates the invention of the modern digital computer by many centuries. Machines for calculating fixed numerical tasks, such as the abacus, have existed since antiquity. Wilhelm Schickard built the first mechanical calculator in 1623. Charles Babbage designed a difference engine in Victorian times, and around 1900 the IBM corporation sold punch-card machines. However all of these machines were constrained to perform a single task, or at best, some subset of all possible tasks.

During the 1940s, as newer and more powerful computing machines were developed, the term computer came to refer to the machines rather than their human predecessors. As it became clear that computers could be used for more than just mathematical calculations, the field of computer science broadened to study computation in general.

The basic concept of information technology, however, can be traced to the World War II alliance of the military and industry in the development of electronics, computers, and information theory. After the 1940s, the military remained the major source of research and development funding for the expansion of automation to replace manpower with machine power.

Since the 1950s, four generations of computers have evolved. Each generation reflected a change to hardware of decreased size but increased capabilities to control computer operations. The first generation used vacuum tubes, the second used transistors, the third used integrated circuits, and the fourth used

integrated circuits on a single computer chip. Advances in artificial intelligence that will minimize the need for complex programming characterize the fifth generation of computers, still in the experimental stage.

The first commercial computer was the UNIVAC I, developed by John Eckert and John W. Mauchly in 1951. It was used by the Census Bureau to predict the outcome of the 1952 presidential election. For the next twenty-five years, mainframe computers were used in large corporations to do calculations and manipulate large amounts of information stored in databases. Supercomputers were used in science and engineering for designing aircraft and nuclear reactors and for predicting worldwide weather patterns. Minicomputers came on to the scene in the early 1980s in small businesses, manufacturing plants, and factories.

In 1975 the Massachusetts Institute of Technology developed microcomputers. In 1976 Tandy Corporation's first Radio Shack microcomputer followed; the Apple microcomputer was introduced in 1977. The market for microcomputers increased dramatically when IBM introduced the first personal computer in the fall of 1981. Because of dramatic improvements in computer components and manufacturing, personal computers today do more than the largest computers of the last century at about a thousandth of the cost.

I. Write down of the texts the English equivalents of these words and expressions: древность, выполнить задание, вакуумный прибор, уменьшать(ся), механический вычислитель, основной источник, восходить к, прогресс, достижение, возможности, прогнозировать, счета, улучшение, усовершенствование, количество, ограничивать, счетно-перфорационная машина, расширять(ся), интегральная микросхема, тип погоды, результат, самолет, предшествовать, ядерный реактор.

Read and translate the text Information Age: For and Against

FOR:

We are now living in the 21-st century in which various kinds of technology have been developed and are being developed. Some examples of these are computers, videotelephones, computerised television, and satellite systems. People have benefited and are benefiting from these kinds of technology. I'm sure the life in the nearest future will be more exciting and comfortable.

It is common now to have a computer at home. Home computers plugged into phone lines become powerful tools of knowledge because they are connected to libraries, universities and major research institutions. A specialist is able to locate latest facts and get new information.

'Smart' TVs provided with new satellite systems are changing. Soon will be available as many as half a thousand channels. Home shopping programmers will allow viewers to shop everything from a yacht to a loaf of bread. Travel services, weather reports, video games, financial services, any kind of educational courses will be available at the touch of a button. The possibilities are almost endless.

By combining the technologies of computers, telephones, and television and then finding new methods of storing and transmitting data it will be possible to transport any information to every home. Meanwhile, the time saved by not having to travel from one place to another for information, goods, and services can be

used for rest, recreation, and education. The quality of life will be surely improved. The world will certainly become a more interesting place in which to live.

AGAINST:

We have a very comfortable life because of modern technology, but it has created some negative aspects. I do not support the idea of having advanced technology because it takes away time from reading and thinking. Before television people used to read, think, and converse. They had the time to look at their lives and values. Today, people prefer to watch exciting things on video and television. Students today belong to the 'TV generation', few of them find time to read books, journals, and newspapers.

Another negative aspect, to my mind is computerized service. If most services are computerized, it will be easy for others to get information about a person. For example, the use of a credit card number to pay bills or go shopping can take away your privacy. Someone can easily find out what you bought and what you paid for it. This can also lead to others using your credit card number, or, in other words, theft.

Translate the following sentences:

1. It is common now to have a computer at home.
2. Home computers plugged into phone lines become powerful tools of knowledge.
3. Soon will be available as many as half a thousand channels.
4. ... any kind of educational courses will be available at the touch of a button.
5. Meanwhile, the time saved by not having to travel from one place to another for information, goods and services can be used for rest, recreation and education.
6. The world will certainly become a more interesting place in which to live.

Among various **recent trends** in the engineering profession **computerization** is the most **widespread**. The trend in modern engineering offices is also towards computerization. Computers are **increasingly** used for **solving complex problems** as well as for **handling, storing, and generating the enormous volume of data** modern engineers must work with.

Scientific methods of engineering are **applied** in several fields not connected directly to **manufacture and construction**. Modern engineering is characterized by the broad application of what is known as systems engineering principles.

Engineers in industry work not only with machines but also with people, to **determine**, for example, how machines can be operated most efficiently by workers. A small change in the **location** of the controls of a machine or of its position with **relation** to other machines or equipment, or a change in the **muscular movements** of the operator, often results in greatly **increased production**. This type of engineering work is called **time-study engineering**.

At the exhibition visitors a tremendous impression produced various machines designed and manufactured in industrialized countries, especially in England. The exhibition presented the current model of steam locomotives, weaving and spinning machines, hydraulic presses, steam hammer, the printing press, the electric telegraph, and other new items.

Контрольные задания к дифференцированному зачету

I курс

Лексические темы	Грамматические темы
1. My native town	1. Present Simple Tense
2. Sports in our life	2. Past Simple Tense

Правила образования настоящего неопределенного времени

Present Simple

Настоящее неопределенное время используется в тех случаях, если:

1. есть указание на общеизвестные факты, неопровержимые истины:

The Sun rises in the East and sets in the West.

Солнце восходит на востоке, а заходит на западе.

2. происходит обычное, регулярно повторяющееся действие:

I often get up at 7 o'clock.

Обычно я просыпаюсь в 7 часов.

3. происходит ряд последовательных действий в настоящем:

I come home, have dinner and then do my homework.

Я прихожу домой, обедаю, а потом делаю домашнюю работу.

4. в предложении употребляются глаголы чувственного восприятия и умственной деятельности:

I think we are wrong.

Думаю, что мы ошибаемся.

В предложении используются слова **never, seldom, often, usually, always, every day (week, month, year)**

We go to school every day.

Мы ходим в школу каждый день.

При образовании утвердительного предложения в простом настоящем времени форма глагола совпадает с инфинитивом глагола (без частицы to) во всех лицах, кроме 3-го лица единственного числа, принимающего окончание –s(-es). Это окончание произносится как [z] после гласных и звонких согласных звуков, как [s] после глухих согласных и как [ɪz] на конце глаголов, оканчивающихся на шипящие и свистящие звуки.

I like tennis.

We work in the garden every day.

She likes cooking.

Для образования вопросительного и отрицательного предложений необходимо добавить вспомогательный глагол do, который не несет смысловой нагрузки и не переводится. Причем в 3-м лице ед. числа окончание –s(-es) прибавляется не к смысловому, а к вспомогательному глаголу, образуя форму does.

Do you like tennis?

Do you work on Saturday?

Does she like tennis?

Правила образования прошедшего неопределенного времени Past Simple

При образовании The Past Simple (Indefinite) Tense (простого прошедшего времени) часто используются слова **yesterday, ... years ago, last (week, month, year...), in 2005, when I was little.**

I was in the park yesterday.

Я был в парке вчера.

We went to the cinema last week.

Мы ходили в кинотеатр на прошлой неделе.

Для того, чтобы образовать **утвердительное предложение** в простом прошедшем времени, необходимо прибавить окончание **-ed** к основе правильного глагола или использовать причастие прошедшего времени (II форма) для неправильных глаголов (см. тему Классификация глаголов).

I walked to school yesterday.

I went to school yesterday.

Чтобы образовать **вопросительное предложение**, необходимо использовать вспомогательный глагол **Do** в прошедшем времени - **Did** и инфинитив смыслового глагола (без to). При этом смысловой глагол теряет окончание –ed, которое переходит к вспомогательному do, образуя форму did.

Did I walk to school yesterday?

Did I go to school (yesterday)?

Отрицательная форма строится так:

I did not (didn't) walk to school (yesterday).

I did not (didn't) go to school (yesterday).

Physical training is an important subject at school. Pupils have physical training lessons twice a week. Boys and girls play volley-ball and basket-ball at the lessons. There is a sports ground near our school and schoolchildren go in for sports in the open air.

A lot of different competitions are held at schools, a great number of pupils take part in them. All participants try to get good results and become winners. Sport helps people to keep in good health. If you go in for sports, you have good health and don't catch cold.

Children and grown-ups must take care of their health and do morning exercises regularly.

There are some popular kinds of sports in our country: football, volley-ball, hockey, gymnastics, skiing, skating. Athletics is one of the most popular kinds of sports. It includes such kinds of sports as: running, jumping and others. Everybody may choose the sport he (or she) is interested in.

3. Where did the Tank Battle take place?
4. What museums of Belgorod do you know?
5. What are the most imposing monuments of Belgorod?
6. What are your favourite places in Belgorod?

My native town

I would like to tell you about my native town. Belgorod is not a small provincial town. It's quite big, its population is more than three hundred thousand. Our town is the main administrative, industrial and cultural center of western Russia. It was of great importance in the past - its fortress protected Russia's southern border against Mongol and Tatar attacks.

I'd like to say that our city is well-known in the country and even all over the world. During the Great Patriotic War the greatest Tank Battle took place not far from Belgorod, in the village of Prokhorovka. It was one of the main turning points in the war.

Young people move to a bigger city when they graduate. Some graduates try to find jobs in Moscow, Saint Petersburg, Kursk or other cities. There are more companies, firms, factories, plants, joint stock companies, than in Belgorod where they can work as engineers, programmers, interpreters, managers and etc.

Another point is they look for good or better salaries. I wouldn't say that all young people do their best to leave Belgorod. A lot of them like our town, it's very green with a lot of parks, beautiful streets and buildings, nice cafes, sport centres. It's a pleasure to work and have a rest here. Our town is rich in sights. There are several museums here, for example: the Historical Museum, the Diorama museum, Fine Arts Gallery, the Exhibition Hall, the Literary Museum, the Museum of Applied Art.

Town people admire innumerable monuments and statues in the streets and parks. The most imposing are the monument to Prince Vladimir, the Eternal Fire to the Unknown Soldier, to Shchepkin, the famous Russian actor and etc. A lot of flowerbeds, wonderful fountains, churches and cathedrals with huge golden domes beautify the town.

So, if you have a good job and a place to live why move to another city? As for me I'm not planning to leave Belgorod. It's my native town, I've got a lot of good friends here. My favourite places here are Sobornaya Square and the area around our University with a nice Church, a beautiful fountain, the embankment and flowerbeds. I'm quite pleased to live here.
